

## 200 SERIES MANUFACTURER QA PROCESS

Mobile Safety View System

# QUALITY ASSURANCE PROCESS

World Best Mobile Safety  
& Security System

## Incoming Quality Control

ICT Tester

PBA Tester

Optical Axis  
Correction Tester

## Production Quality Control

High pressure Waterproof  
Tester for Camera

High pressure Waterproof  
Tester for Monitor

Aging

## Outgoing Quality Control

Audio/Video Automated  
Inspection Tester

Low Luminance Tester

Lux Tester

➤ ➤ ➤ Quality Assurance Process (QAP) is dedicated to:

- Ensure the constant function reliability of mobile safety view system to help safe driving and improve the efficiency in workplaces.
- Meet environmental standards that lead to the customer satisfaction and global environmental regulation.
- Guarantee safety of people, by monitoring around vehicle and workplaces to avoid any dangerous situation.
- Control and maintain optimal conditions of products for manufacturing and usage.

## Reliability Quality Control

Vibration Chamber

High pressure Waterproof Chamber

Salt Spray Chamber

Thermal Shock Chamber

ESD Tester

Temp & Humidity Chamber

IP68 Chamber

➤ Solid & Dependable

- For 34 years, our QC team pays the greatest attention to quality and constantly improves its laboratories to control its manufactured products without compromising performance. Our QC team consistently conducts a variety tests, e.g. global standards in thermal shock, vibration, waterproof, temperature and humidity that help our customers drive operational efficiency, product quality, safety and compliance while minimizing environmental impact. Our products comply with global regulations and most of all, we are constantly improving ON COMPONENTS, MATERIALS, PACKAGING AND AUTOMATED MANUFACTURING INSPECTION SYSTEM.
