SVS1UQB

## Universal Quad Box

Turn a single image screen into a split or quad screen display

### Product Information

The SVS1UQB is a universal quad control box. Allows you to input up to 4 cameras and control the output from 1-4 cameras and single, split, tripple or quad display output. Using trigger wires to display cameras in Quad display or POC, which shows 2 cameras in split screen or use the manual control to select cameras as required make this simple and easy to use. Can output via RCA for Video and Audio or 6 pin to 9 pin monitor cable to connect to our 100 Series specific monitors. Housed in a solid metal case this is a sturdy and simple way to get Quad cameras into most. Normal/Mirror din switch for easy image changes if camera orientation is incorrect keeps it all simple and relevant.

**2 YEARS**  
WARRANTY\*  
100 Series
